

FIRE PRINT

IMPRINTS THAT WILL LAST

RESTAURANT DURABLE
IMPRINTS

PAIR OUR RESTAURANT INKS WITH OUR RESTAURANT QUALITY VITRIFIED OR GLASS ITEMS FOR THE ULTIMATE DRINKWARE FOR YOUR RESTAURANT/COMMERCIAL BUSINESS.

[HOW IT WORKS]

Our Restaurant/Commercial Ink Hi-fire imprints are directly screened onto the item, then fired in at over 1100 degrees. This bonds the pigment of the imprint to the glaze of the item resulting in excellent imprint retention.

[APPLICATIONS]

Great for:

- Restaurants
- Bars/Night Clubs
- Schools, Colleges & Universities
- Government Agencies
- Hospitals and Health Centers

[THINGS TO KNOW]

Due to the Firing Process, this Ink will have limitations:

- Four Color Process is not available but we can do Multiple Spot Colors.
- Aluminum, Stainless Steel, Plastic or Acrylic items are not available.
- The finished Imprint will have a Semi-Matte appearance.
- Commercial Inks are very limited in Color. PMS color matching is not available.
