

VANISH-INK™

ADD SOME **ACTION** TO YOUR MORNING COFFEE!
These imprints change when a hot drink is added!

Vanish-Ink is a unique temperature sensitive imprint that can be added to many ceramic and glass items intended for hot drinks.

- The imprint changes appearance from room temperature to hot!
- Use for imprint features that disappear when hot. Make part or all of the imprint disappear!
- Use to create an imprint to be revealed when hot.
- Use with spot color or full color logos. Many options are available.
- Our unique precision process allows part or all of the artwork to be revealed while leaving some features of the imprint visible all the time.
- Create a "teaser", where part of the image shows all the time and the rest appears when a hot beverage is added.

Room Temp

HOT MUG

[APPLICATIONS]

- Introducing new logos: old logo is always there, new logo appears
- Significant anniversary commemorative mugs: "60 years in business" appears
- Service companies – Pest Control: bugs that go away
 - Plumbing service: a drain clog that goes away;
 - Fire prevention service: smoke that disappears;
 - Lawn service: black dirt disappears and grass appears
- Souvenir Items: make the name appear
- Forensic Labs: evidence appears
- Morning Shows: night that turns to day

Our designers can help!

DISAPPEARING VANISH-INK™ MUGS:

To make a feature of your artwork disappear when hot, simply have us print that feature in Vanish-Ink, it will be there at room temperature, and disappear when hot. This works well on white or light colored items.

Other great mugs to use with Vanish-Ink:

Without Vanish Ink

With Vanish Ink

Want this look?

HERE'S HOW:

- Design the mug the way you want it to look when hot.
- Add the feature you would like to disappear. This feature will be printed in Vanish-Ink.
- The feature can just disappear using any color of Vanish-Ink, or it can hide something underneath using darker colors of Vanish-Ink like black or navy blue.

NOTE: When hot, there will always be a slight "ghost" image where the Vanish-Ink is printed. Vanish-Ink loses approx 85% to 90% of it's color and when clear looks like wax paper. Light Vanish-Ink colors do not hide colors underneath, use dark colors for this.

ITEM: 100-00 - IMPRINT: 2 Colors + Black Vanish Ink on 1 side
Send us your concept and we will quote!

GLASS VANISH-INK™ MUGS:

Glass mugs are best treated as Feature Disappearing mugs. These mugs have to look good both at room temperature and hot, so be creative.

Want this look?

HERE'S HOW:

- Design the mug the way you want it to look when hot.
- Cover up the area which will not show at room temperature, but appear when hot.

G2097

ITEM: G2097 - IMPRINT: 1 Color + Vanish Ink on 1 side
Send us your concept and we will quote!

BE CREATIVE!

See if you can take a shape inspired from the logo and use it as the cover up to be printed with Vanish-Ink.

Vanish Ink for disappearing imprints are available in many colors.

Maroon Green Blue Purple Black

Other colors like yellow, orange and specific PMS colors are subject to minimums and lead times.

REVEALING VANISH-INK™ MUGS:

The feature is hidden underneath the Vanish-Ink at room temperature, and, when hot, the Vanish-Ink will turn colorless and whatever is underneath will be revealed!

This works well when the Vanish-Ink matches the color of the mug.

140-70 -- Lottery numbers appear when mug is hot

Other great mugs to use with Vanish-Ink:

125 Series 180 Series 260 Series

600 Series 816 Series 840 Series 845 Series

Please provide your art file for pricing and suitability review.

We are happy to look at your concept and offer suggestions or recommendations to make your imprint work best with our process!

Considerations: Vanish-Ink can be a fun innovative way to present your art on mugs. Here are a few things to keep in mind as you design and care for your personalized Vanish-Ink mug:

- **REQUIRED PPP** - A printed Preproduction Proof or signed waiver will be required to ensure the customer is satisfied with their Imprint.
- **FREE SAMPLES** - We highly recommend getting FREE* random samples of Vanish Ink items sent to the customer so they can see how our process works. *Free with provided shipping account number.
- **Activated Vanish-Ink is mostly colorless when hot** - Vanish-Ink will retain ~10% of the original color. There will be a very faint impression of the Vanish-Ink imprint when hot.
- **Avoid sunlight, UV light and temperature extremes** - Sunlight, UV light, long exposure to fluorescent lights, and very hot or very cold temperatures, will degrade the Vanish-Ink effect. Keep in a cool, room temperature location away from direct sun, UV and fluorescent lights.
- **Hand wash only** - High temperature and sanitation cycles will damage the Vanish-Ink effect.
- **White Vanish-Ink is NOT available.**
